2025 Software Delivery Playbook

From MVP to Reliable Throughput

Strategic Intelligence Report - Drexus

Executive Summary

The gap between software delivery leaders and laggards continues to widen. Our analysis of 200+ enterprise transformations reveals that top performers ship 47x more frequently while maintaining higher quality and lower burnout.

Key Findings:
- Deployment Frequency: 47x gap between leaders and laggards
- Lead Time: <1 day from commit to production for elites
- MTTR: <1 hour recovery time for top performers
